

In Memory of Professor
Michael Peikrishvili

The loss of Professor Michael Peikrishvili, General Manager of the OGASH Multiprofile International Scientific-Research Laboratory Correspondent Member of WORLD OGASH BOARD, Chachava Perinatal Medicine, Obstetric and Gynecology Research Institute senior staff scientist, was irretrievable to the Georgian medical society. He was born in 1948 in Tbilisi. After finishing Pirogov Moscow State Medical Institute, within the period of 1973 - 1982 he firstly worked at Lumumba Moscow University and then in the Extension Courses Union Institute at the sub-faculty of biochemistry. From the 1983 to the end of his life Michael Peikrishvili was in charge of the radio-immunological laboratory of Chachava Perinatal Medicine, Obstetric and Gynecology Research Institute.

In 1979 he defended a Ph.D. thesis in Moscow. Being the author of 2 discoveries and various scientific works he was the first in Georgia who implemented the methods of radio-immunological diagnostic in perinatology and gynecology. The main subject of his scientific works was the enzymology. Liver enzyme biochemical behavior discovery: peptide hormone dynamic in the mother and embryos organism within the periods of pregnancy and childbirth. In 1983 he has been elected as chairperson of the OGASH Subcommittee of Laboratory Medicine.

Professor Peikrishvili was a very intelligent person, true friend and true scientist. He went away leaving a grief in our soul.
