## PREFACE

The abstract book of the International Annual Congress of the Department of Obstetrics and Gynecology (the 30 and 31 of MAY 2007 at the J.W. Marriot Hotel) has been prepared so it could be available as reference for educational purposes. It includes the scientific papers presented at the different sessions.

I am sure that the speakers and chairmen of the sessions will further enrich the congress and will make the meetings a memorable success. The sessions will provide a forum for exchange of most recent generated scientific information and experience in many topics. The congress will provide a platform for debate and interaction between international experts.

The main target remains to serve women toward a happy prosperous and healthy life.

This annual congress established itself as an event to be expected every year. It helps communications with colleagues and of considerable interest for the clinicians, postgraduate students, and for all senior staff.

A special session is prepared for The ORGANISATION GESTOSIS AFFILIATED AND SPONSORED HOSPITALS (OGASH) which was founded on 2003.

The goals of the OGASH include support of meetings, sponsoring the arrangement of the high-level Hospital and Ambulatory Reproductive, Feto-Maternal Medicine, Ob/Gyn and Perinatal medical Service in different Continents all around the world.

The OGASH session is dedicated to the discussion of the hypertension with pregnancy and its management.

The members of the EGYPTIAN-GERMAN SOCIETY OF OBSTETRICS AND GYNECOLOGY (E.G.S.O.G.) will present many scientific talks that will enrich the congress. The members have met in Berlin on 2006 and in Cairo on 2007, and their participation in the congress will make it a fruitful and beneficial event.

Pre-congress courses will help to achieve the goals by allowing interest groups to develop practical updating of certain subspecialties.

I am grateful to all the people who helped to bring the congress about. Great many people have volunteered to assist and helped to make the tremendous success of the congress.
