Cancer Control Caucasus 1st Summit:

Cancer Control Caucasus Network (CCCN) capacity building initiative:

- A call to the World Cancer Declaration 2008 and dissemination this information through Caucasus cancer control service network
- Place cancer on the development agenda. Increase the political priority given to cancer by demonstrating that a country's investment in dealing with its growing cancer problem is an investment in the economic and social well-being of the country. Take immediate steps to slow and ultimately reverse the growth in death from cancer, by committing to the targets set out below and providing resources and political backing for the priority actions needed to achieve them
- Cancer Control Caucasus 2013 on-line poll: Results evaluation 2014-2020 CCCP adoption
- CCCN organization, team election, 2013-2014 biannual project updating
- Summit Recommendation on Ratification of the World Cancer Declaration 2008 by the Parliament of Georgia and updating Cancer Control National Program for

its set-up with National Law on Public Health and initiating adequate arrangements in all the countries of Caucasus. By working together, we can more easily implement the priority actions and achieve the 2020 targets

- Push government to implement policies that will support risk reducing strategies at a community level and enable individuals to make more informed consumption choices and adopt healthier behavior
